DETAILED ACTION

Response to Amendment

The examiner acknowledges the amendments made to claims 38,42,81 and 106. Claims 1-37, 40,41,51-80,102,103 and 105 are canceled; claims 38,39,42-50,81-101,104 and 106 are pending in this application.

Allowable Subject Matter

Claims 38,39,42-50,81-101,104 and 106 allowed.

Reasons for Allowance

Independent claims 38,81 and 106 are allowable over the prior art of record as they contain limitations that would not have been obvious to one of ordinary skill in the art at the time of the invention. Specifically, the examiner finds applicant's argument that the combination of Marnell, II (US 5,393,057), Yoseloff (US 6,398,645 B1) and Walker et al. (US 6,364,765 B1) uses hindsight reasoning to teach the limitations of the claims (Remarks, Page 13) to be persuasive. There is no motivation for combining the features of Marnell, II, Yoseloff and Walker et al., and therefore the invention would not have been obvious to one of ordinary skill in the art at the time of the invention.

Further, the examiner finds applicant's argument that the combination of Marnell, II, Yoseloff and Walker et al. does not include a first value payout is associated and displayed with the first group of cells, as well as a second value payout that is different

from the first value payout associated and displayed with the second group of cells, to be persuasive. That is, Yoseloff does disclose an embodiment of the bingo game wherein each cell must be designated before being a payout value being awarded in the "cover-all" embodiment disclosed in col. 10, lines 25-28. However, in this cover-all embodiment, Yoseloff discloses the payout value is dependent on "the basis of how few numbers must be selected in the drawing of the second set of symbols to completely fill an individual bingo card" (col. 10, lines 28-31), i.e. the fewer the number of bingo balls selected upon designation of all of the bingo cells the higher the resultant payout. For example, a player who completes an entire bingo card after 20 balls have been drawn would be awarded a higher payout than a player who completes an entire bingo card after 30 balls have been drawn. Therefore, it would not have been obvious to one of ordinary skill in the art at the time of the invention to display the respective award value amounts associated with the groups of cells as the amounts are not determined until the each of the cells has been designated.

Team play of slot machine games is well known in the art, as taught by Walker et al. (US 6,142,872; US 6,206,782 B1; US 6,312,332 B1; US 6,361,441 B1; US 6,733,390 B2; US 6,692,353 B2; US 6,503,146 B2), Tracy et al. (US 6,416,407 B2) and Piechowiak et al. (US 6,012,982), wherein multiple gaming machines collaborate to fulfill a set of requirements, and, upon doing so, all of the participating gaming machines are awarded a payout. However, the collaborative slot machine games taught by Walker, Tracy and Piechowiak do not disclose the features described in claims 38,81 and 106, including a first and second group of cells having associated outcomes and

payout values, and designating a cell in a group of cells with a designator indicating the gaming machine at which the corresponding outcome was obtained. Additionally, these limitations would not have been obvious to one of ordinary skill in the art at the time of the invention in light of the inventions disclosed by Walker, Tracy and Piechowiak.

Claims 39,42-50,82-101 and 104 depend from either claim 38 or claim 81 and are therefore also allowable.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pertinent prior art includes: Walker et al. (US 6,142,872; US 6,206,782 B1; US 6,312,332 B1; US 6,361,441 B1; US 6,733,390 B2; US 6,692,353 B2; US 6,503,146 B2), Tracy et al. (US 6,416,408 B2) and Piechowiak et al. (US 6,012,982); each disclose a form of a collaborative slot machine game.
